

my place with jonathan alcorn

I began working as a photo assistant for Jonathan Alcorn in August of 2003 and maintain this position currently. I see each assignment - usually celebrity portraits, through to completion. I also manage the digital workflow by coordinating shoots, giving technical support during portrait sessions, such as the light preparation, optimizing digital photos for ftp delivery. I assisted in shoots for the following publications: *Washington Post, New York Times, People and Entertainment Weekly.*
